Meeting Minutes - Client Meeting #8

What Was Discussed:

- Updated Ruth on the goal for this term in terms of the next peer-testing milestone - have the database properly implemented and function as expected.
- Talked about the database design that we spoke about as a team at our team meeting - having separate tables for each category and linking them through keys. Ruth thought this was a good way to do it.
- Briefly discussed the issues we were having with database connectivity. Mentioned that we have reached out to Sharon and she has been helping. We have yet to test the database connection again but this would be resolved by the end of the week (hopefully).

Feedback/Questions/Concerns From Ruth:

- The other teams have been reaching out about having a link to their directory on the main page of the site. Ours is already on the site so Ruth asked if we can do it for the other teams and update them (and her) if we can. Also, add some other blank links that point to other directories for her other projects.
- Ruth would like to know how we are going to ensure security of the database as it will hold some sensitive information such as student numbers.

What To Work On This Week:

- Implement small changes made to the proposal.
- Try to connect to the database successfully. If not, reach back out to Sharon.
- Create directories for the other teams on the main page and update them and Ruth when it is done.
- In our next team meeting, discuss the security aspect of the database (how will we ensure this?).
