Meeting Minutes - Client Meeting #6

Questions & Answers From User Feedback Session

- Q: "Option" is used a lot in the proposal. Is this meant to be a placeholder for information to be added later ?
 - A: It should remain option and each option is a different case that the user will be contributing to. We could have the user add names to it to make it more clear.
- Q: What is the difference between the 2 stakeholder section (one on dashboard and one in utilitarianism)?
 - A: The one on the dashboard should be a general, global list of stakeholders that should stay consistent across all pages. The stakeholders in other pages like utilitarianism, should be the same but with the option to add a stakeholder and add a utilitarian analysis for that stakeholder.
- Q: The form input might seem inconsistent. What should be done about this?
 - A: This is feedback that has been given before so maybe finding a balance among different types of inputs might be best.
