Meeting Minutes - Client Meeting #5

Client Questions & Answers

- For setting up each team's directory, would the client need to do it or can we do it?
 - This can be done easily through cPanel. Any team can access this to add their own directory.
 - Requested that we make access to each directory link password protected.
-

Things to Keep in Mind:

- We want to make the site flexible for mobile devices as well (in terms of styling).
-

Feedback on Demo:

- Everything is looking good
 - All dashboard elements are there and encompass what was outlined in the proposal.
-

For Next Week:

- Incorporate more scripting on the server side to handle storing student into and database storage/retrieval.
- If we can: have some feedback from peer-testing to go over with client.
